

# Tame *your* Tupperware cupboard

Empty the cupboard and group like with like.

Match containers to lids and identify what you need to keep or you're prepared to part with.

It's amazing how many containers I didn't actually need and how many lids didn't have bottoms!

Group containers with lids kept separately. I divide between small and large.

Larger storage containers and other plastic ware kept on the bottom shelf and stacked. Everything is labeled on the shelves so that everyone knows where items go when repacking after use.

# Tupperware cupboard **TAMED!**
